# A Perfect Fit

## How To Measure For Collars And Harnesses

Use this visual as a guide for how to measure dogs properly for a collar, harness or vest.

**Girth:** Wrap the tape measure around the broadest part of the dog's chest.

### MEASUREMENTS NEEDED FOR:

A COLLARS

B HARNESSES

**Neck:** Collars should sit higher up on the neck, so measure here when determining collar size.

- Tips:**
- Harnesses and plastic buckle collars are not for tie out. Instead, consider a metal buckle as a safe restraint option.
  - For a comfortable and secure fit, leave enough room for two fingers to fit comfortably between the dog and the collar/harness.
  - Prior to putting a harness on the dog, estimate and adjust the harness to the dog's size. This will make adjusting the harness easier when put on the dog.

### Measure First!

Dogs come in all different shapes and sizes and therefore, each has a unique fit. The best way to fit them properly is by using their measurements first and weight range second.

## How To Measure For Collars And Harnesses

Use this visual as a guide for how to measure dogs properly for a collar, harness or vest.

**Girth:** Wrap the tape measure around the broadest part of the dog's chest.

**MEASUREMENTS NEEDED FOR:**

**A** COLLARS

**B** HARNESSES

**Neck:** Collars should sit higher up on the neck, so measure here when determining collar size.

- Tips:**
- Harnesses and plastic buckle collars are not for tie out. Instead, consider a metal buckle as a safe restraint option.
  - For a comfortable and secure fit, leave enough room for two fingers to fit comfortably between the dog and the collar/harness.
  - Prior to putting a harness on the dog, estimate and adjust the harness to the dog's size. This will make adjusting the harness easier when put on the dog.

### Measure First!

Dogs come in all different shapes and sizes and therefore, each has a unique fit. The best way to fit them properly is by using their measurements first and weight range second.

## Prong Collar Sizing Guide in Three Steps (Chrome-Plated Steel)

**1**

Choose the **wire gauge** according to your dog's weight.  
(See table below).

**2**

Size your dog's neck and add 2".  
(See illustrative sizing image).  
Example: Dog's neck size = 10" + (2")  
Your dog's prong collar size is at least 12."

**Note: Collars should sit higher up on the neck, so measure here when determining collar size.**

**3**

If collar length needs to be adjusted, add or remove links accordingly.

## Wire Gauge According to Weight

up to 66 lb (30 kg)	2.25	up to 88 lb (40 kg)	3.25
up to 77 lb (35 kg)	3	up to 154 lb (70 kg)	4
