## Case Study: Busby

**Patient:** Busby, a 7 year old male healthy neutered Bichon Frise.

**Incident:** Busby was involved in a road traffic accident, which caused a severe injury to the left foreleg. He was non-responsive to previous treatments. Image 1 shows 10 days after previous treatments and the start of HP Healing Cream.

**Product:** HP Healing Cream.

**Application:** Wound closure of a chronically infected festering open non-healing wound with failure to respond to multiple different antibiotics including topical creams.

Start of HP Healing Cream

21 days

Final result

Result

Busby has hardly a visible mark. He walks and plays normally and has healed completely with hair regrowth on affected area.

Item #: 14745

- **How HP Healing Cream works:**
  - Creates a protective barrier over wound
  - Keeps wound/cut moist
  - Reduces scab formation which in turn reduces scratching at wound
  - Accelerates healing process

- **The benefits of HP Healing Cream:**
  - No harsh chemicals
  - No known side effects
  - Does not sting
  - Does not harm healthy tissue
  - Safe for puppies, kittens, pregnant and nursing animals

- **Promotes healing:**
  - Cuts
  - Bites
  - Wounds
  - Burns
  - Skin rashes
  - Skin ulcers
  - Skin irritations
  - Post surgical

- Proven to be effective on previously non-responsive wounds.
- May be used on open or bandaged wounds.
- Works in conjunction with the body's natural healing mechanism.
- A must have for all First Aid Kits when immediate wound care is required.
