**CareChewz Chicken Marinade** are made from same **100% USA COLLAGEN** as our natural chews. They are not just coated on the surface, the flavor penetrates into the hide giving it a longer-lasting and more enjoyable experience.

**CareChewz** are 100% collagen, a healthy choice for a daily chew that provides your dog with a long-lasting safe chew that combines excellent dental care and the benefits of all natural collagen from beefhide. Made completely in USA with only collagen from USA Beefhide.

Giving **CareChewz** collagen chews as healthy daily dental care, rewards dogs with cleaner teeth and stronger gums. **DIGEST-A-BOOST**, a bio-availability blend, added in the preparation process, provides an increased digestibility after chewing that is gentler than other alternative chews.

**We care about your pet. We care about their chews.**

#### **DIGEST-A-BOOST**

- applied in the preparation process
- gently pre-conditions the hides
- thoroughly rinsed before drying
- for a safer, healthier digestion

**DIGEST-A-BOOST:** this compound effectively conditions and softens the beef collagen during the preparation process, resulting in a gentler, healthier digestion for dogs. When cleaning and conditioning the hides prior to drying and assembly, the Digest-A-Boost solution is applied topically. This liquid permeates the hide causing it to have a safer and gentler digestion process in a dogs system.

**CareChewz** are made from 100% pure USA Collagen from Beefhide. They are hand crafted by our talented staff right here in Mundelein, Illinois, USA. The shapes of these chews is one thing that set us apart from any others on the market. We have collaborated with licensed veterinarians to design a chew with a dog's optimum chewing style in mind. Each beefhide chew is formed from a thick consistent hide, has large surfaces, and are single pieces; this decreases the chance of smaller pieces breaking off to cause a choking hazard. The Collagen Braids and Small Wraps are better suited for small to medium dogs, and the Large Wraps and Twists are perfect for larger and more aggressive chewers.

OR ADDITIVES**

*did you know?*

That all our USA Beefhide is collagen? Collagen is a key ingredient in many industries ranging from cosmetics and household to dentistry and the medical field. It is beneficial in healing wounds, regenerating tissue and used as grafting material. Collagen is the most abundant protein in the body, found in muscles, bones, tendons and blood vessels. It makes up 75% of a dog's skin. Collagen is known as the "glue" that holds the body together. Collagen is crucial in keeping a dog's connective tissues flexible and maintaining the integrity of their joint health. Injuries like hip dysplasia and torn cruciate ligaments are more likely to occur when collagen is depleted in your dog's body. So, adding collagen into the diets of dogs has many benefits.

**1st ingredient,  
COLLAGEN**

**easily  
digestible**

**strengthens  
joints &  
soft tissue**

**reduces  
plaque &  
removes tartar**
