

ROUND LAKE FARM

PRODUCT CATALOG

FRESH. NATURAL. PREMIUM.

OUR BRAND

Round Lake Farm is located in Soap Lake, WA, in the heart of the Columbia Basin, home to some of the worlds best hay production. We farm 4,000 acres and produce over 20,000 tons of hay annually. All of our hay is inspected and tested to ensure quality and consistency. We hand select the very best hay for our small animal brand and the rest gets exported. From growing to packaging and everything in between, premium quality is our top priority. We believe that our pets are family and they only deserve the best and nothing less.

In line with premium quality, sustainability is also very important to our team. Our nutrient rich volcanic soil is irrigated from the Columbia River through the Columbia Basin Project Irrigation System. Aside from the product inside the bag, we source all of our packaging locally within the United States to reduce our environmental footprint and support our local businesses.

At Round Lake Farm, we believe that quality should not be sacrificed, which is why we control the entire process from the time the seed is planted in the ground until it arrives into distribution. Our vertical integration allows us to control quality by only packaging the best of the best, while minimizing our environmental footprint and creating a better future for humans and pets alike.

We grow it. We package it. We guarantee it.
